Descripteur(s): Matériel didactique * Enseignement professionnel * Formation professionnelle * Répertoire * Secondaire (Ordre d'enseignement)

Le MEQ présente la liste du matériel didactique dont l'utilisation est autorisée pour l'enseignement professionnel au secondaire en 1988-1989. La majorité des titres fournis dans la liste étaient déjà autorisés pour les anciens programmes et cours. Le MEQ ne peut pas assurer les organismes scolaires que ces titres sont adaptés aux nouveaux programmes et cours. Le matériel didactique présenté est classé en matériel de base, matériel complémentaire et matériel de référence. L'autorisation accordée au matériel didactique indique que ce matériel fait preuve d'une qualité acceptable en ce qui regarde: 1. les exigences d'un programme ou d'un cours offert; 2. la correction de la langue; 3. les valeurs morales et religieuses; 4. l'usage des noms de lieux officiels; 5. l'usage du système international de mesures; 6. les exigences requises à l'égard des stéréotypes discriminatoires.

INTRODUCTION

In accordance with section 17 of the Education Act, the Ministère de l'Éducation hereby presents the list of instructional materials authorized for use in schools which will be providing vocational education at the secondary level in 1988-1989.

CONTENTS

The majority of the titles on this list were authorized for use with the former programs and courses. The Ministère can offer educational organizations no assurance that these will be suitable for the new programs and courses.

DEFINITIONS

• Basic materials

Materials designed specifically for teaching, which correspond with the compulsory elements of a program or course which is in effect, and which are required by the students of a class for the duration of the program or course.

Teacher's manuals which accompany the basic teaching materials are included in this category.

Workbooks which in themselves constitute basic teaching materials, or which are part of such materials, require ministerial authorization for classroom use.

• Complementary materials

Materials designed particularly (though not exclusively) for teaching, which correspond to some elements of a program or course which is in effect, and which are for occasional or optional classroom use. To be authorized, complementary instructional materials must be reusable.

Usage dictionaries, handbooks for grammar, and atlases are considered by the Ministère to be teaching materials. Consequently, all works of this type are subject to ministerial authorization, and are generally classified and listed as complementary material.

• Reference materials

Materials classified as reference or resource works are considered inadmissible for authorization, and do not require official listing in order to be purchased by school boards. Included in this category are general reference works such as biographies and encyclopedias, works of general interest and works of a literary nature such as anthologies, plays, periodicals, short stories, poetry and novels.

However, literary materials which contain a significant instructional component, or which are accompanied by a teacher's guide, may be classified and listed as complementary material.

CRITERIA FOR AUTHORIZATION

Authorization of teaching materials indicates that they show an acceptable level of quality with respect to:

- the instructional requirements of a given program or course which is in effect;
- correct language usage;
- moral and religious values;
- the use of official place names;
- the use of the international measurement system;
- the requirement pertaining to discriminatory stereotypes.
